Innovation Award for Plansee

Together with the Austrian business magazine "trend", the Austrian Society for Consumer Studies (ÖGVS) set out to find the most innovative companies in Austria and has awarded them with innovation awards.

The number of patents submitted and granted by Austrian companies in 2018 and 2019 was determined with the help of the International Patent Classification System (IPC). Not only the number of patents played a major role but also their citation frequency, which indicates a high technical relevance of the respective inventions. In total, the Plansee Group received seven awards. We are proud of these awards and would like to thank all employees involved.

In 2018/2019, Plansee applied for 11 patents in Austria. This means that Plansee currently holds more than 1,000 individual patents worldwide.
