Getting aboard

Apprenticeship 2020 - get part of a strong team!
It definitely makes sense to embark on your career at Plansee. Not only do we attach
great importance to sound vocational training, but we also have an eye on things further
along the road with the interesting opportunities for development that we can offer in
Reutte and around the world.

Would you like to get a taste of the world of work? Then a school internship is just right for
you. We will give you an insight into the world of work at Plansee and let you see what
everyday working life looks like close up. In this way, you will gain initial practical work
experience and perhaps even discover your future dream job right away.

Do you have the old problem of more wishes than money in your pocket? We have the
solution. Come to us for a holiday job and combine business with pleasure: Earn money
while taking your first steps in the world of work. Does that sound like a win-win? It is!

Had enough of the classroom and really
eager to start a vocational training? We
reckon that's a good choice. This will
provide you with the tools you need to give
your later professional life a real boost.

In our training Center in Reutte, 150 young
people are currently getting to know the
company and our products from the ground
up. The excellent vocational training
speaks for itself - many of our managers
started their careers with an
apprenticeship at Plansee and Ceratizit.

Experienced trainers and other
apprentices are looking forward to welcoming you at our sites in Lechbruck, Reutte and
Seon.
No matter whether you are looking for a school internship, a holiday job or vocational training, just take a look at our vacancies and check whether anything appeals to you. And if not, that's no problem. Just get in touch with one of our contact persons. We will then get our heads together to see what can be done.

You'd like to take a look? Then come to our next "open house day" at the training center. This event takes place every year in autumn. We will publish the exact date on the Facebook-site of our training center.

Some impressions from the "open house day 2019".
